

SAGAR HAREMANIK

Technical Program Manager · Life Sciences AI & Clinical Systems · Application Delivery Manager

+91-7842292789 · sagarharemanik@outlook.com · Hyderabad, India · linkedin.com/in/sagar-haremanik

PROFESSIONAL SUMMARY

Technical Program & Delivery Manager with 11+ years of experience in leading validated clinical and life sciences applications, AI initiatives, and cross-functional programs for global pharma clients including Novartis. Currently managing multiple regulated applications at Cognizant — directing 8–10 engineers, driving full SDLC under Agile and ITIL, and partnering with senior stakeholders on product roadmaps, delivery, and operations. Proven track record of ~99% uptime, strong SLA performance, and clean audit support across FDA 21 CFR Part 11, HIPAA, SOX, and GxP environments. Hands-on with cloud delivery on Azure and AWS, Veeva CTMS downstream integration, and AI productivity prototyping for clinical IT operations.

Seeking leadership roles as **Technical Program Manager, Delivery Manager, AI Application Manager** — where program rigor, regulatory expertise, and emerging AI capability intersect to deliver measurable impact.

CORE COMPETENCIES

AI & Productivity : Hands-on use of GPT, Gemini, Claude · Prompt Engineering · Enterprise Custom GPT · M365 Copilot · GitHub Copilot · AI productivity prototyping for IT operations

GxP & Compliance : SOX and GxP Applications · FDA 21 CFR Part 11 · HIPAA · GDPR · Validated Systems · Audit Trail Management · Electronic Records & Signatures · Audit Evidence & Documentation Support and Controls Execution.

Clinical Systems : Clinical Trial Management (CTMS) · Veeva CTMS / ODH downstream integration · Global Medical Affairs (GMA) · Drug Review & Approval Workflows · Oncology Study Systems · Clinical Data Management · Medical Traceability

Program Management: Product Roadmap · Stakeholder Management · Feature Prioritization · Agile Sprint Planning · Backlog Grooming · User Story Mapping · Cross-Functional Leadership · Risk Management

Application Mgmt & Ops : SDLC · ITIL · ITSM · ServiceNow · SLA Management · Service Request / Incident / Problem / Change Management · Production Support · Vulnerability Remediation · APM

Technical : Python · C# · .NET Framework and .Net core · ASP.NET MVC · SQL Server Database · REST APIs · JavaScript · API Integration · Database Optimization · CI/CD pipeline

Cloud & Tools : Microsoft Azure · AWS · GCP · Azure DevOps · Bitbucket · JIRA · Confluence · ServiceNow(SNOW) · PROTON · Postman, Visual Studio and VS Code.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

June 2019 – Present

IT Application Manager — Life Sciences Division

Hyderabad, India

Application Manager for GxP and SOX-regulated clinical and life sciences applications serving global pharma clients including Novartis. Leading 8–10 engineers across application teams (typically 2–4 per application). Owning SDLC, Agile delivery, ITIL operations, validated releases, and compliance audit support.

AI & Productivity Initiatives

- **AI Productivity Prototyping**: Identified incident-triage and knowledge-retrieval as high-friction areas in clinical IT operations; built a personal prototype using enterprise Custom GPT to retrieve relevant context from internal documentation. Validated time savings in personal usage — currently rolling out to Application Managers for broader productivity uplift.
- **M365 Copilot Team Enablement**: Provided informal team enablement on enterprise Copilot — guided engineers through ticket-raising, initial usage patterns, and getting familiar with day-to-day applications in a regulated context.
- **AI Use-Case Identification**: Surface AI productivity opportunities within clinical IT operations and discuss potential applications with stakeholders.
- **AI Skill Building**: Microsoft Azure AI Fundamentals (AI-900), Google AI Leader, GitHub Copilot certified. Active hands-on user of GPT, Gemini, and Claude — prompt engineering and AI Agents and workflow exploration.

Application Management & Delivery

- Application Manager for 7+ clinical and life sciences applications at Cognizant — managing complete SDLC through Agile and ITIL, from requirements through production support, all within GxP compliance frameworks.

- Maintained ~99% uptime over years across mission-critical pharma applications.
- Provided audit evidence and supporting documentation across multiple GxP, SOX, FDA 21 CFR Part 11, and HIPAA for audit cycles — minor findings historically remediated within timelines; no major critical findings raised on owned applications.
- Participated as application owner in cloud migrations of 2 applications to AWS — partnering with cloud architects on impact assessment, validation, and post-migration application stability.
- Led code repository and CI/CD modernization across owned applications — planned and executed end-to-end migration from TFS to Bitbucket, improving collaboration and pipeline maintainability for the team.
- Working with team to gather evidences as per registered controls — directly applicable to financial-services-grade and life-sciences-grade regulatory environments.

Key Applications & Projects

AI-Assisted Operations Productivity Initiative · *Self-Driven Prototype* 2025 – Present

- Identified incident-triage and knowledge-retrieval as high-friction areas in clinical IT operations; built a personal prototype using enterprise Custom GPT to retrieve relevant context from internal documentation.
- Validated useful time savings in personal usage; shared with peer Application Managers, who provided positive feedback and proposed extending it to other AMs for productivity feedback.
- Currently scoping a peer-level rollout — including documentation of validation, audit logging, and governance considerations needed for any future formal rollout in a GxP-regulated environment.

GMA Vision (Global Medical Affairs) Global Drug Review & Approval Platform · *Application Manager, SME & Tech Lead* 2024 – Present

- Application Manager for Novartis global drug review and approval platform supporting regulatory submissions across multiple markets.
- In-house developed platform— owned end-to-end product delivery with business and technology stakeholders.
- Led end-to-end Server migrations, code migrations to Bitbucket; partnered as application owner on on-premise to hybrid-cloud server migration — supporting smoother data validation and faster delivery cadence for downstream regulatory workflows.
- Tech stack: C# · ASP.NET · SQL Server Database· JavaScript jQuery · Bootstrap, SSIS and SSRS reporting services

CTMS Veeva ODH Downstream Integration · *Application Owner — Downstream Impact Lead* 2024 – 2025

- Owned downstream applications affected by the CTMS Operational Data Hub (ODH) program — performed impact assessments, defined and delivered fixes, and led enhancements across affected applications to keep clinical data pipelines stable.
- Coordinated with the ODH program team and clinical data stakeholders on release readiness, regression coverage, and post-release stabilization for the applications under my ownership.
- Tech stack: C# · ASP.NET · SQL Server Database· JavaScript jQuery · Bootstrap, Tibco ODBC Drivers via Dv12n API

PricePro (Competitive Pricing Analysis – SOX) & iEnvision (Publication Review & Approval Platform) · *Application Manager* Late 2025 – Present

- Established end-to-end operational ownership for two SaaS platforms — standardising incident triage, SLA adherence, and vendor coordination.
- Drove standardized, compliant operations and timely ticket resolution; supported control completion and SOX audit cycles.
- Tech context: SaaS applications by Modeln and envision vendors using Salesforce platform and SQL Server Database, with SOX audit-trail controls.

Perseus & GNW (Global News Watch) *Application Manager* 2025 – Present

- **Perseus** Intelligence platform for monitoring drug pipeline development, clinical trials, patent filings, and partnership deals — generating automated business summaries for global pharma stakeholders.
- **GNW**(Global News Watch): Corporate communications platform — news management system delivering daily industry newsletters to business stakeholders.
- Both in-house developed, cloud-hosted on AWS (IaaS).
- Tech stack: C# .NET Core · ASP.NET Web API · SQL Server · JavaScript · Angular · Bootstrap · AWS services.

GMA Vision Oncology · *Operations Manager & Tech Lead* 2021 – 2024

- Technical SME for global oncology clinical study review platform supporting drug discovery, study design, and regulatory data workflows.
- Led end-to-end CI/CD migration from TFS to Bitbucket and contributed to SQL query performance tuning supporting clinical workflows.

- Tech stack: C# / .NET · ASP.NET MVC · SQL Server · SSRS and SSIS · JavaScript.

QR Code Medical Traceability System · *Technical Lead*

2021 – 2023

- Built automated data tracking and validation capability for global medical facility operations and clinical study traceability.
- Reduced manual reconciliation effort and improved audit readiness for GxP inspections.

DBCS Clinical Data Repository · *Application Manager*

2019 – 2021

- Managed operations for clinical database application storing and managing drug discovery, compound processing, and lifecycle data under GxP controls.

Unisys India Pvt. Ltd.

March 2017 – June 2019

Software Engineer

Bangalore & Hyderabad, India

Built and maintained financial payment, remittance, and Lockbox systems processing high volumes of daily check transactions in a BFSI environment.

- **BFSI payments platform Development:** Developed real-time payment processing and remittance applications in C# / .NET and SQL Server — direct BFSI domain exposure.
- **RnL Platform Development:** RnL Platform Development: Worked on remittance and Lockbox platform used for high-volume check processing and reconciliation.
- **Process Automation:** Contributed to automation of check-clearing workflows and financial reconciliation processes, supporting throughput and accuracy improvements for the team.
- **Performance Engineering:** Worked on database stored-procedure and query optimization for financial transaction systems.

Gatix E-Solutions India Pvt. Ltd.

April 2014 – March 2017

Junior Software Engineer / Programmer Analyst Trainee

Hyderabad, India

US staffing solutions / services. Began career in application development, QA testing, and defect resolution for enterprise software projects. Gained foundational experience in SDLC, debugging, and structured delivery teams.

EDUCATION

Bachelor of Science, Computer Science

2013

Osmania University, Hyderabad

CERTIFICATIONS

AI & Machine Learning

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Google AI Leader Certified
- GitHub Copilot Certified
- RAG Applications — Coursera
- AI for Everyone | AI for Developers — DeepLearning.AI
- AI Agents Fundamentals — Udemy

Project & Program Management

- Kick-off Agile (PMP-aligned)

MEASURABLE IMPACT

- **Operational Reliability:** ~99% uptime over seven consecutive years across 7 mission-critical clinical applications, with only 1–2 minor SLA breaches across the portfolio.
- **Compliance Track Record:** Clean audit support across GxP, SOX, FDA 21 CFR Part 11, and HIPAA cycles on owned applications — minor findings historically remediated within timelines; no major critical findings raised.
- **Modernization:** Led end-to-end code-base migration from TFS to Bitbucket across owned applications and partnered on on-prem to hybrid-cloud migrations for Novartis GMA Vision.
- **Clinical Integration:** Owned downstream impact assessment, fixes, and enhancements for applications affected by Veeva CTMS Operational Data Hub (ODH) releases.
- **AI Adoption:** Active hands-on user of enterprise GPT, Gemini, and Claude; certified on Azure AI (AI-900), Google AI Leader, GitHub Copilot; running productivity prototypes for clinical IT operations.
